SeeSnake® NANOreel® Inspection Reel

RIDGID®

NEW!

The RIDGID® SeeSnake® NANOreel® opens up different possibilities in specialized drain inspection by offering the smallest-diameter camera technology and most flexible push cable of all SeeSnake® systems. NANOreel allows you to Inspect a wider array of specialty applications (small pipes, tubes, voids, and conduits) which conventional inspection systems often cannot inspect.

The included kickstand lets you set up the NANOreel in the optimal position for stability while pushing or retrieving the cable. The NANOreel is compatible with any SeeSnake device or combine it with the handheld RIDGID micro CA-350(x) Inspection Camera[*].

▶ **Small 15.5 mm camera head with ultra flexible push cable navigates tight spaces in 25 to 50 mm (1" - 2") lines.**

▶ **A built-in kickstand offers in-field versatility and improved stability with multiple configurations.**

▶ **Lightweight and compact carrying case design is easy to carry to jobsites and store in-between.**

▶ **Integrated 512 Hz sonde allows for easy line tracing and locating.**

* Micro CA-350(x) inspection camera sold separately or in System SKU's.

SPECIFICATIONS:

Model		SeeSnake® NANOreel®
Camera	Diameter	15.5 mm
	Type	Fixed
Line Capacity		25 mm to 50 mm (1" to 2")
Push Cable	Length	25 m (82')
	Diameter	7,2 mm (0.28")
	Minimum Bend Radius	40 mm (1.5")
Cable Flexibility		Ultra Flex
Sonde		512 Hz, Integrated
Weight		5,5 kg (12.1 lb.)
Length		337 mm (13.3")
Width		224 mm (8.8")
Height		411 mm (16.2")
Drum Diameter		305 mm (12"), Interchangeable

*The NANOreel will traverse a 25 mm (1") straight pipe, but its ability to go past 90-degree turns will depend on the material and construction of individual pipes and joints. Some fittings in small diameter joints will allow passage of the camera in only one direction.
